

使用Tcc编译简单c代码并运行

c代码如下：

```
#include <stdio.h>
void main()
{
    printf("hello world!");
}
```

接下来打开cmd，进入所编写的.c文件所在目录。然后输入tcc -run .c，其中.c为文件名称。输入完成后回车，就可以看到运行的结果，如下：

The screenshot shows a Windows command prompt window with the title bar "C:\Windows\system32\cmd.exe". The prompt is at "E:\tcc\daima>". The user has entered "tcc -run 1.c" and pressed enter. The output "hello word" is displayed. The prompt is now "E:\tcc\daima>" with a cursor.

```
C:\Windows\system32\cmd.exe
E:\tcc\daima>tcc -run 1.c
hello word
E:\tcc\daima>
```
